

Master® Heavy-Duty Industrial Barrel Fans

Master has been building powerful fans since 1953, and now that power has reached an all new level. These heavy-duty industrial fans outshine traditional barrel fans to blow massive amounts of air and reduce your reliance on A/C—saving you money in the process. Their heavy-duty steel construction includes thicker barrels and guards, giving you a fan that can take the abuse of any industrial setting and that will handle the toughest demands. They also include a fuse-protected accessory outlet for daisy chaining multiple fans, so you can cool even the largest of spaces. Whether it's a workshop, warehouse, garage, outdoor area, or other large space, you can count on these fans to get the job done. As always, Master fans are loaded with features:

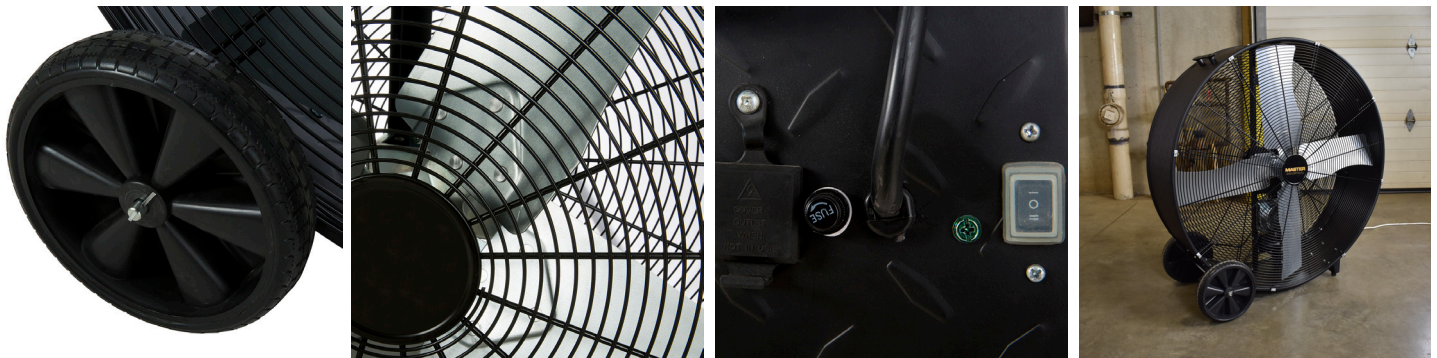

Features and Benefits

- Matched belt-drive motors and blades for the highest achievable levels of airflow, rated up to 14,800+ CFM
- High-efficiency, heavy-duty, two-speed motors for long life
- Machined, built-in handle and heavy-duty solid wheels for convenient mobility
- Heavy-gauge steel construction with OSHA-compliant safety guards and four oversized blades for maximum power and safety
